ABSTRACT

The abstract for your paper for the PVLDB Journal submission. The template and the example document are based on the ACM SIG Proceedings templates. This file is part of a package for preparing the submissions for review. These files are in the camera-ready format, but they do not contain the full copyright note. Note that after the notification of acceptance, there will be an updated style file for the camera-ready submission containing the copyright note.

1. INTRODUCTION

Lorem ipsum.

2. ACKNOWLEDGMENTS

This section is optional; it is a location for you to acknowledge grants, funding, editing assistance and what have you. In the present case, for example, the authors would like to thank Gerald Murray of ACM for his help in codifying this *Author's Guide* and the `.cls` and `.tex` files that it describes.

3. ADDITIONAL AUTHORS

Additional authors: John Smith (The Thørväld Group, jsmith@affiliation.org), Julius P. Kumquat (The Kumquat Consortium, jpkumquat@consortium.net), and Ahmet Sacan (Drexel University, ahmetdevel@gmail.com)

^{*}Dr. Trovato insisted his name be first.

[†]The secretary disavows any knowledge of this author's actions.

[‡]This author is the one who did all the really hard work.

4.1 References

Generated by bibtex from your `.bib` file. Run latex, then bibtex, then latex twice (to resolve references).

APPENDIX

You can use an appendix for optional proofs or details of your evaluation which are not absolutely necessary to the core understanding of your paper.

A. FINAL THOUGHTS ON GOOD LAYOUT

Please use readable font sizes in the figures and graphs. Avoid tempering with the correct border values, and the spacing (and format) of both text and captions of the PVLDB format (e.g. captions are bold).

At the end, please check for an overall pleasant layout, e.g. by ensuring a readable and logical positioning of any floating figures and tables. Please also check for any line overflows, which are only allowed in extraordinary circumstances (such as wide formulas or URLs where a line wrap would be counterintuitive).

Use the **balance** package together with a `\balance` command at the end of your document to ensure that the last

page has balanced (i.e. same length) columns.
